

Fall 2000 Enrollment Report

Fall 2000 Headcount Enrollment

This year marks the first year that the University's report on fall enrollment includes both on-campus and off-campus enrollments. We have switched to this convention because the University has now experienced two full years of funding for off-campus degree-credit instruction and because this convention is consistent with federal guidelines for reporting fall enrollments. All trend data in the attached tables have been revised accordingly.

Headcount enrollment this fall reached a record high of 162,761 students. This is an increase of 1,779 students over the 160,982 who were enrolled last fall. Institutions experiencing increases were ASU, ECSU, NCA&T, NCSU, UNC-A, UNC-CH, UNC-C, UNC-P, UNC-W, WCU, and WSSU. Among the focused growth institutions, five grew by a combined total of 785 students, accounting for 44 percent of the system growth. Of the seven focused growth institutions only FSU and NCCU experienced decreases in their overall enrollment. The decrease at FSU was due partly to their effort to contain the previous year's over-enrollment and return to a more sustainable growth track. At NCCU, first-time freshman enrollment increased by 13 percent, suggesting that the institution is now moving to meet future growth targets. These and other institutional trend data are shown in Attachment 1 of your report.

Although they are not shown in this attachment, other enrollment data identify the groups of students that have experienced above average increases in their enrollment this year. They include:

First-time students at all degree levels (up by 3.4 percent)

- Readmitted and other students who return to complete their degrees (up by 7.5 percent)
- Students who are not enrolled in a degree program (up 5.1 percent)
- Women (up 1.6 percent) and minority students (up 1.8 percent)
- Traditional 18-21 year old students (up 2.6 percent)
- Students who are enrolled in first professional degree programs (up 2.1 percent)

The increases in first-time students and returning students suggest that enrollment growth in the future will begin to accelerate as our projections have shown. The increases in women and minority students follow long-standing trends that have affected University enrollments for more than a decade. The growth in 18-21 year olds and the corresponding decrease in the enrollment of 22-24 year olds and 25-35 year olds reflect their respective numbers in the population of the State, as does the enrollment of students 36 and older, which increased by 1.2 percent this fall.

First-Time Students

Reflecting the increase in the number of North Carolina high school graduates, the number of in-state UNC freshmen who graduated from high school during the previous year grew by 3.6 percent this year. Attachment 2 shows the UNC attendance rates of these high school graduates broken out by race/ethnicity. It shows an increase in the attendance rates of Asian-American and American Indian students and a decrease in the attendance rates of Hispanic and African-American students. The attendance rate of White students was unchanged. The overall attendance rate was 30.3 percent, the same as last year's rate.

Each year approximately 30 percent of new undergraduates entering the University are transfer students. In recent years, this percentage has declined slightly as growing numbers of students in the community colleges stay to complete a new college transfer curriculum. The curriculum was established when the community college system converted from a quarter to a semester system in the fall of 1997. During this period of conversion, the University and the community college system adopted a Comprehensive Articulation Agreement that permits students transferring from the community colleges to UNC institutions and having completed a college transfer curriculum to satisfy general education requirements without a loss of credit. Since most community college students take their courses on a part-time basis, this fall was the first time in which these changes were expected to produce an increase in transfer student enrollments. It is therefore reassuring to see that the number of in-state transfer students has increased by 4.5 percent.

First-time enrollments of master's, doctoral, and first professional students increased by 4.4, 9.7, and 10.0 percent, respectively. Much of this increase was from graduate students who were recruited with the help of tuition remissions provided by the 1998 General Assembly.

Minority Presence

If we count students who did not report their race or ethnicity as minority students, then minority enrollment overall increased by 1,346 students (2.9 percent) and represented 29.0 percent of the University's total enrollment. If we leave such students out of our count, then minority enrollment increased by 726 students (1.8 percent) and represented 26.7 percent of the University's total enrollment. In either case, the University continues to enroll record numbers of minority students on its campuses.

In percentage terms, the growth for each identified minority group shown in Attachment 1 exceeded the growth for White students, which was 0.4 percent. The percentages were:

Black students up 1.0 percent;

- American Indian students up 5.4 percent;
- Asian students up 3.4 percent;
- Hispanic students up 7.2 percent; and
- Students of unspecified race/ethnicity up 13.8 percent.

Minority presence at the historically black and white institutions shows mixed results. Black enrollment at the historically white institutions increased by 1.6 percent while Black enrollment at historically black institutions remained essentially unchanged. On the other hand, White enrollment at the historically black institutions decreased by 6.9 percent, while White enrollment at the historically white institutions increased by 0.5 percent. Taken together, these changes produced an enrollment at the historically white institutions that is 10.4 Black, and an enrollment at the historically black institutions that is 14.1 percent White. In percentage terms, it is the third year in a row that Black students have exceeded 10 percent of the total enrollment at the historically white institutions. This means that 44.5 percent of UNC's Black students now enroll at historically white or historically American Indian institutions. By contrast, at the historically black institutions, the percentage of White students fell from 15.0 to 14.1 percent of their total enrollment this fall. This is the fourth year of decline in this percentage, and the second time since 1985 that it has fallen below the target level of 15 percent established in the University's 1981 Consent Decree.

Distance Education

The number of students enrolled in off-campus distance education classes this fall was 7,377, an increase of 1,312 (21.6 percent). The number of these students taking both on- and off-campus classes was 1,561 or 21 percent of the total distance education enrollment, while the number taking only off-campus classes was 5,816 or 79 percent of the total distance education enrollment. This suggests that growing numbers of regular session students are choosing to take off-campus classes, often through use of instructional technology. The most rapid growth in these classes is occurring at the undergraduate level for resident students (36.4 percent). Students taking distance education classes are predominantly part-time.

Trends in Freshman SAT Scores

This year the average combined SAT score of entering UNC freshmen increased by five points to a total of 1073. This increase exceeds the 4-point increases in each of the past two years and continues a reversal of the slight downward three-year trend in SAT scores that began in 1995. The average combined score of in-state students increased by six points to a total of 1067; the average for out-of-state students increased by four points to 1108. Institutions that experienced an overall increase in scores were ECU, NCSU, UNC-A, UNC-CH, UNC-C, UNC-W, WCU, and WSSU. Trends in SAT scores by institution and residency status are presented in Attachment 3.

Mr. Chairman, this completes my report.

SOURCE: *****OCR (Compliance Report of Institutions of Higher Education). Effective fall 2000, these data were revised (1981-2000) to include "distance education only" enrollments not included in previous reports. These data are taken historical Student Data Files, where the quality of "distance education only" data improves in more recent years. Fall 1972 "Other" is included in "White." Fall 1990 and later - "Other Races" includes non-resident aliens, unreported and mixed race.

UNC-GA ProgAssess/HSGrads.AT007.U/11-1-00

* Estimates of private N.C. high school graduates by race assume that five percent were black, .6% as Asian, and .4% as Hispanic in each year.

Estimates of total graduates are derived by using 99% of 12th grade enrollment, which is obtained from the web site of NC Dept. of Administration, Div. of Non-Public Education.

** Total includes a small number of students in the "Other" race category.

- Source:
1. Public high school graduates - State Department of Public Instruction
 2. Private high school graduates - Estimated by GA Staff.
 3. Special high school graduates - survey directly from the high school, except NCSA which provided Student Data File.
 4. First-time freshmen enrollments - Student Data Files.

UNC-GA ProgAssess/Admiss.AT001.U/11-1-00

*Averages are based only on freshmen with SAT scores. Four percent of the total first-time freshmen in Fall 2000 did not have SAT scores.

**Excludes four-year diploma students at NCSA and Agricultural Institute students at NCSU.

Note: Extension students are included in the table from 1998 to 2000.
